

PRODUCT	CAN SIZE	DOCUMENT SIZE
Printed Tin Can	4.0625"D × 5.5"H	12.497"W × 5.3219"H

Bleed — Extend any background colors or graphics at least 1/16" beyond the trim line on all sides into the bleed area to ensure full ink coverage.

Trim — Finished size. Any text or graphics that are outside this area will not appear on the can.
TIP: For a continuous design, artwork should match on both left & right sides of the trim line.

Safe Area — Important text and graphics must remain inside the green lines to avoid printing on the seam or being covered by the lid at the top.

Silver Can* — Gray represents the silver of the can. Please indicate the metallic effects by placing them on the layer labeled METALLIC ELEMENTS HERE or indicate the white ink underlay on the White Ink base layer.
*The gradient-colored areas approximately reflect the indents on the can.

Black color swatch should be built using C-25%, M-25%, Y-0%, K-100% in order to produce solid coverage. 100% black ink only will appear more weathered/distressed rather than dark and solid.

BEFORE STARTING YOUR DESIGN...

Review our artwork requirements:
